

VPA No-Show Policy

Your health and wellness is important to us as your healthcare providers. Regular appointments are necessary to ensuring that your medical conditions are adequately monitored.

We require that you keep all scheduled and confirmed appointments with our providers. In the event that you must cancel/reschedule an appointment, we ask that you notify us by the day prior to your appointment or as soon as possible if an emergency prohibits you from being available at your appointment date and time. If you have a scheduled and confirmed appointment and your provider does not show up, please call the office.

In order to safely prescribe medications, we must be able to see you on a regular basis for medication monitoring. Certain medications may not be refilled if there has not been a recent appointment for medication monitoring.
